

Find New Computers

Thursday, August 22, 2024 1:43 PM

Log in to the BDC of the location -> Administrative tools -> DHCP

You will find new laptops in IPv4 -> Scope -> Address Leases.

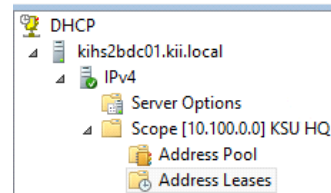

It will be named as KMS + its service tag, and

You will find new laptops in IPv4 -> Scope -> Address Leases.

It will be named as KMS + its service tag, and use the IP (or hostname + domain) to connect via VNC.

Remember:

VNC password	&b7bc251
Administrator (local login)	@D5db700s

Retrieve service tag

Friday, August 23, 2024 1:19 PM

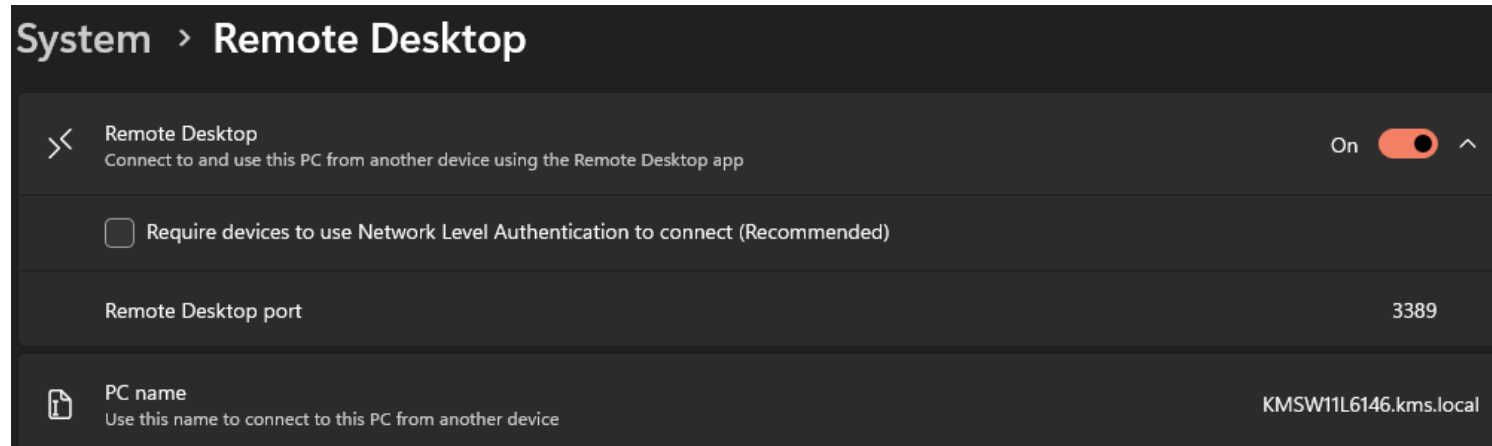

wmic bios get serialnumber

Enable remote access

Thursday, September 19, 2024 1:53 PM

Remote desktop settings -> Enable remote desktop

Uncheck the "require devices to use network-level auth" checkbox.

Power Plan Settings

Thursday, September 19, 2024 1:50 PM

Edit Power Plan

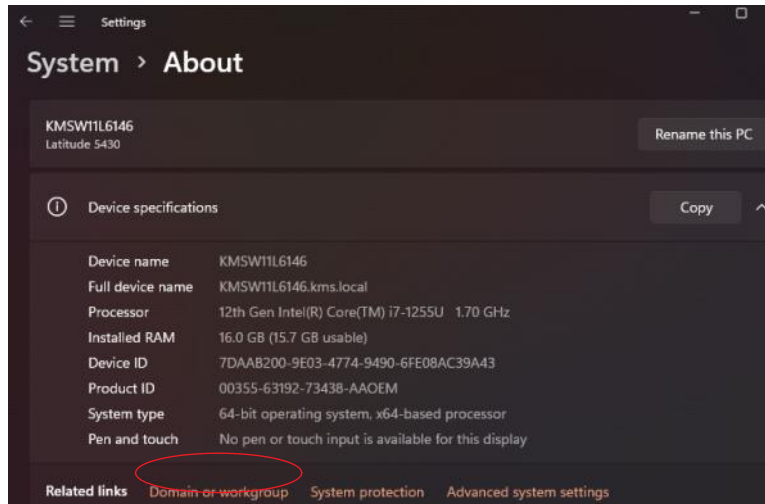

Set Battery to 45 Min. to Blank Screen and 1 Hour to Sleep

Set Connected to Power to Never Blank Screen and Never to Sleep

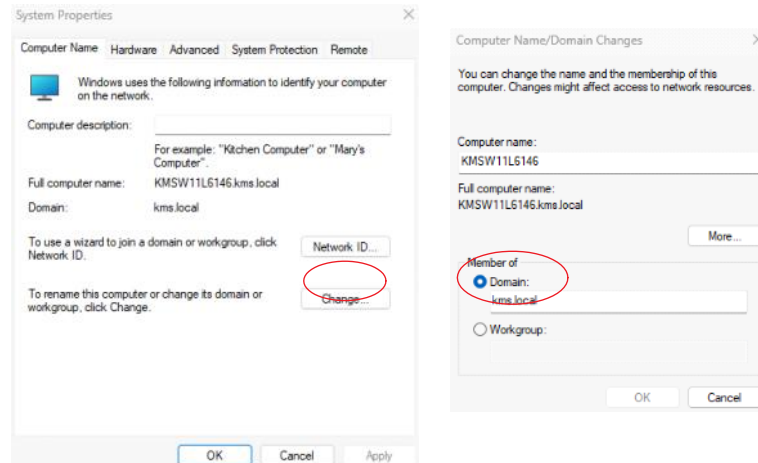

Join Domain & Rename PC

Thursday, August 15, 2024 11:57 AM

Settings -> System -> About -> Domain or workgroup -> Change -> Domain box

DON'T FORGET TO MOVE COMPUTER TO THE CORRECT OU ON AD

Make sure to check which Domain to join; This is important.
You can find a list of domains [here](#).

Once joined to the domain, head over to **Active Directory** and do the following:

- Move the computer to the correct OU
- Check the existing computer names and name the new PC accordingly

The naming convention Location-OS-FormFactor-#

In the example above, Location = KMS, OS = W11, Form Factor = L = Laptop,
and # = next available number.

PowerShell method (Admin):

Add-Computer -DomainName "yourdomain.com" -NewName "New-PC-Name" -OUPath "OU=Computers,DC=yourdomain,DC=com" -Credential (Get-Credential) -Restart

Add -NewName "New-PC-Name" to change the name of the PC while joining a domain.

KFI

Wednesday, October 29, 2025 3:57 PM

Add **-NewName "New-PC-Name"** to change the name of the PC while joining a domain.

KFW:

Add-Computer -DomainName "kikkoman.com" -OUPath "OU=KFI Walworth,DC=kikkoman,DC=com" -Credential (Get-Credential) -Restart

KFW (Spare PC's)

Add-Computer -DomainName "kikkoman.com" -OUPath "OU=Spare PC's,OU=KFI Walworth,DC=kikkoman,DC=com" -Credential (Get-Credential) -Restart

AP3:

Add-Computer -DomainName "kikkoman.com" -OUPath "OU=AP3,OU=KFI Walworth,DC=kikkoman,DC=com" -Credential (Get-Credential) -Restart

JFC

Thursday, October 30, 2025 2:22 PM

Add **-NewName "New-PC-Name"** to change the name of the PC while joining a domain.

HAPI

Add-Computer -DomainName "jfc.local" -OUPath "OU=HAPI,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

IDC BRANCH

Add-Computer -DomainName "jfc.local" -OUPath "OU=IDC BRANCH,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JAT - ATLANTA

Add-Computer -DomainName "jfc.local" -OUPath "OU=JAT - ATLANTA,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JBT - BALTIMORE

Add-Computer -DomainName "jfc.local" -OUPath "OU=JBT - BALTIMORE,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JCH - CHICAGO

Add-Computer -DomainName "jfc.local" -OUPath "OU=JCH - CHICAGO,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JDE - DENVER

Add-Computer -DomainName "jfc.local" -OUPath "OU=JDE - DENVER,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JHI - HAWAII

Add-Computer -DomainName "jfc.local" -OUPath "OU=JHI - HAWAII,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JHO - JFC HEAD OFF

Add-Computer -DomainName "jfc.local" -OUPath "OU=JHO - JFC HEAD OFF,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JHT - HOUSTON

Add-Computer -DomainName "jfc.local" -OUPath "OU=JHT - HOUSTON,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JLA - LOS ANGELES

Add-Computer -DomainName "jfc.local" -OUPath "OU=JLA - LOS ANGELES,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JMI - MIAMI

Add-Computer -DomainName "jfc.local" -OUPath "OU=JMI - MIAMI,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JMX - MEXICO

Add-Computer -DomainName "jfc.local" -OUPath "OU=JMX - MEXICO,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JNY - NEW YORK

Add-Computer -DomainName "jfc.local" -OUPath "OU=JNY - NEW YORK,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JPM - PMAI

Add-Computer -DomainName "jfc.local" -OUPath "OU=JPM - PMAI,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JSE - SEATTLE

Add-Computer -DomainName "jfc.local" -OUPath "OU=JSE - SEATTLE,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JSF - SAN FRANCISCO

Add-Computer -DomainName "jfc.local" -OUPath "OU=JSF - SAN FRANCISCO,OU=JFC Computers,DC=jfc,DC=local" -Credential (Get-Credential) -Restart

JFC.CA

Wednesday, October 29, 2025 3:56 PM

Add **-NewName "New-PC-Name"** to change the name of the PC while joining a domain.

JCM

Add-Computer -DomainName "jfc.ca" -OUPath "OU=JCM - Montreal,OU=JFC.CA Computers,DC=jfc,DC=ca" -Credential (Get-Credential) -Restart

Enable BitLocker

Thursday, August 15, 2024 1:06 PM

Open windows explorer -> right click on 'This PC' -> Properties -> BitLocker

Allow Ping via Firewall

Monday, November 4, 2024 11:48 AM

Search "**Windows Defender firewall with advanced security**" and open it.

Inbound rules -> Press 'F' until "File and Printer Sharing (Echo Request - ICMPv4/6-In)" is found. Select all 4 and enable them.

Via PowerShell (Admin):

```
Get-NetFirewallRule -DisplayName "*File and Printer Sharing*Echo Request*" | Enable-NetFirewallRule
```

Verify:

```
Get-NetFirewallRule -DisplayName "*File and Printer Sharing*Echo Request*" | Format-Table -Property DisplayName, Enabled, Profile
```

Japanese Keyboard

Thursday, September 19, 2024 1:45 PM

Only if requested

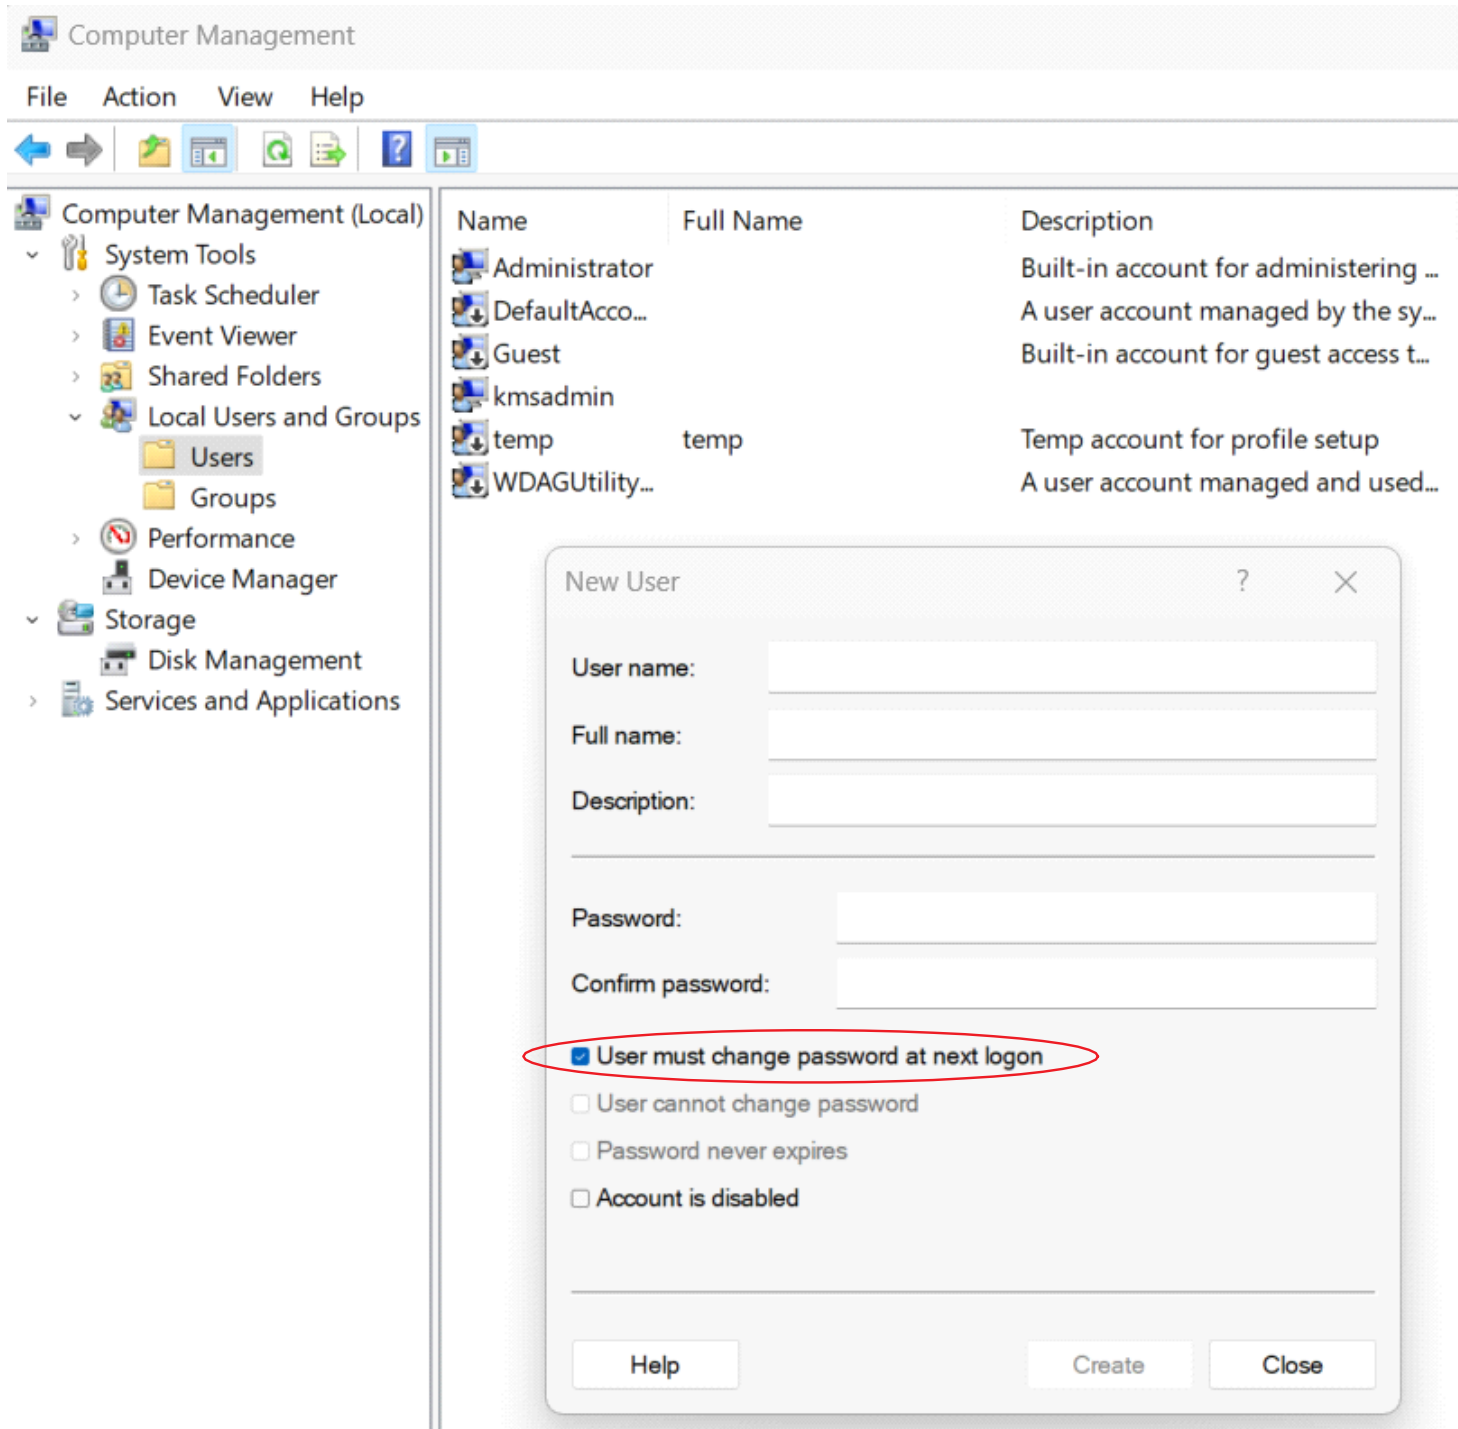

Temp user creation

Thursday, August 15, 2024 12:00 PM

Computer Management -> System Tools -> Local Users and Groups -> Users -> Right click -> New User

@D5db700s

Uncheck 'User must change password'

Add temp user to "Remote desktop users" local group

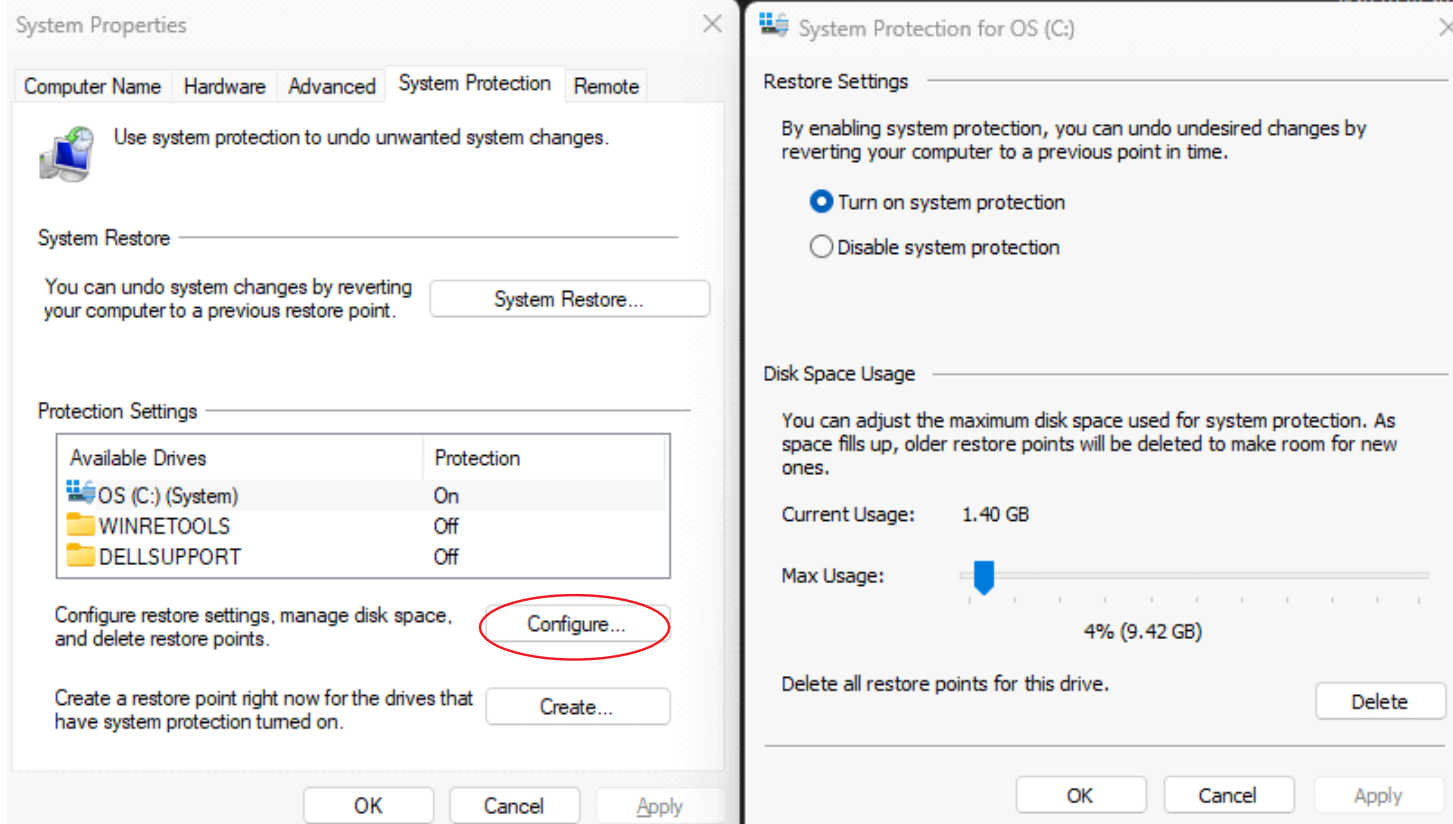

Now log into the temp user

System Restore

Thursday, August 15, 2024 1:04 PM

Run -> sysdm.cpl -> System Protection -> Configure

Make sure "system protection" is enabled and Disk Space Usage set to around 10GB

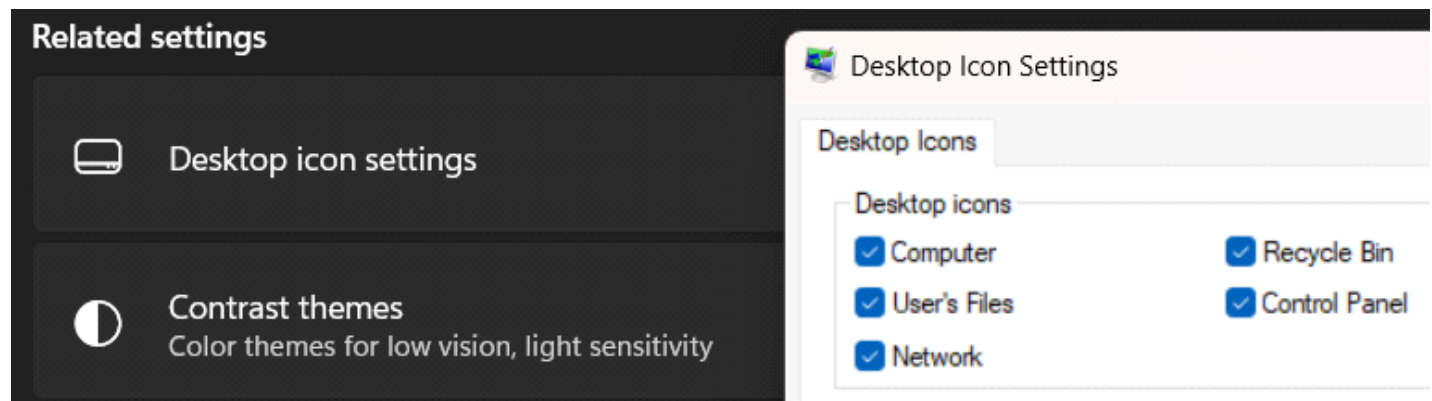

Windows

Thursday, August 15, 2024 1:03 PM

Check Windows update

Windows Desktop items (Computer, Control Panel, Network, etc):

Right click desktop -> Personalize -> Themes -> Desktop icon settings

Change the theme while you are there.

KMS Support folder: Place in Start menu's 'All apps' section

Option 1: Open 'All apps' and right click on a program -> open file location

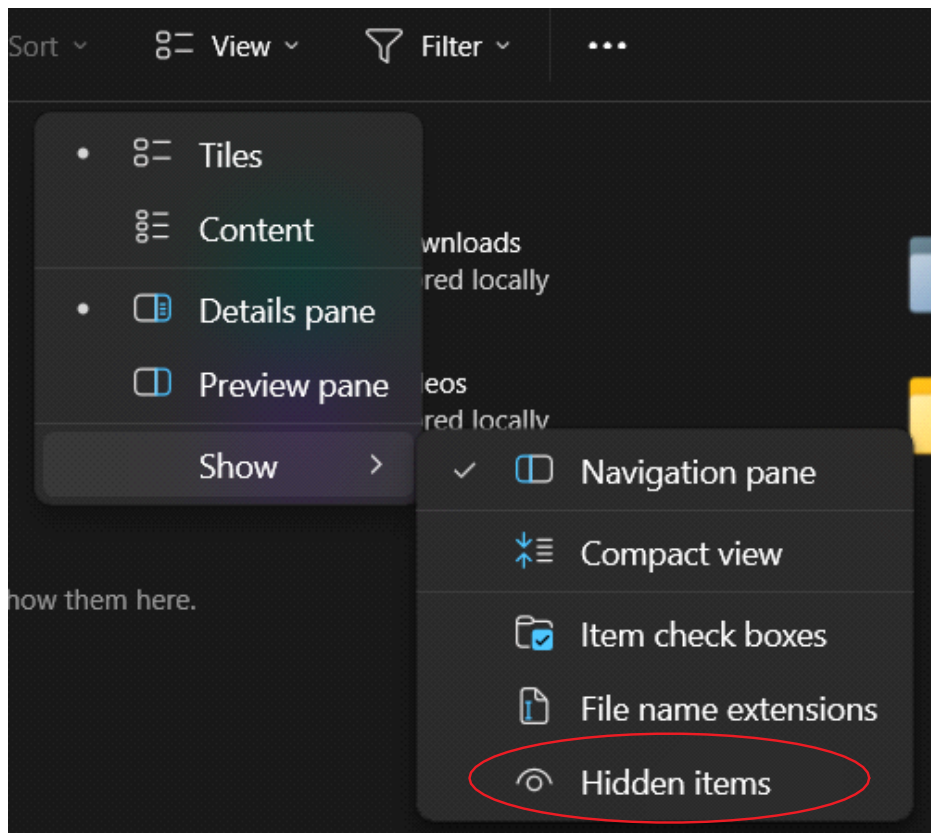

Option 2: Go directly to the following directory:

C:\ProgramData\Microsoft\Windows\Start Menu\Programs

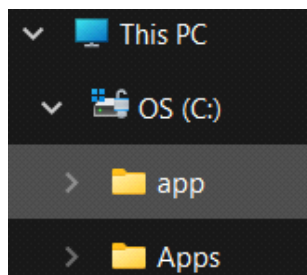

Remove Unnecessary tiles on the start menu:

Start -> right click icon -> unpin from start

Enable hidden files in explorer:

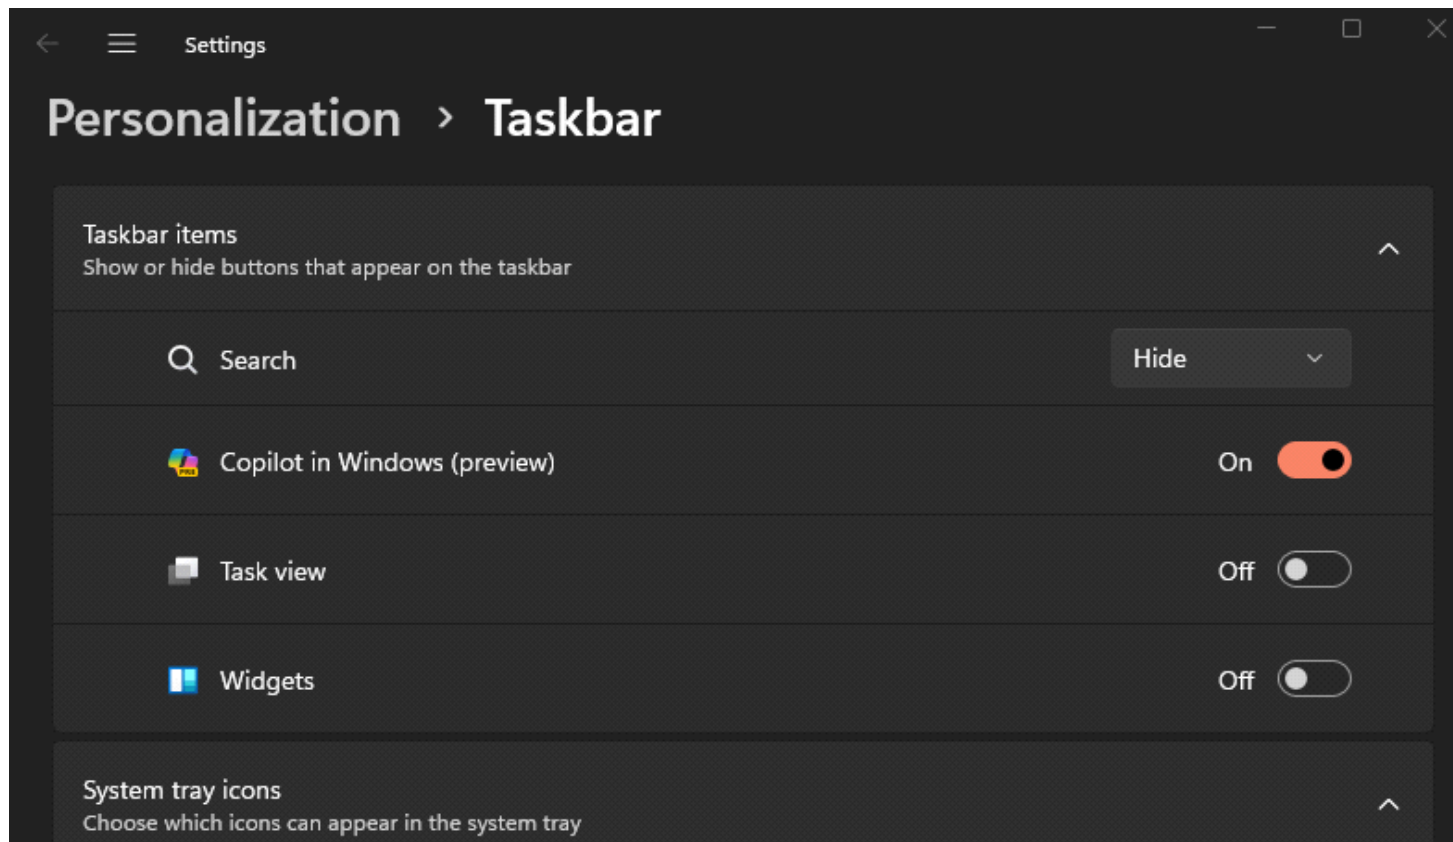

Drop down open on C drive:

Disable widgets:

Right click on desktop -> Personalization -> Taskbar
OR
Right click on taskbar -> taskbar settings

Rename the PC (if needed):

Right click 'Start' -> System

Disable startup programs:

Right click Taskbar -> Task manager -> Startup apps

Switch web browser

Thursday, August 15, 2024 1:05 PM

Open chrome -> set as default browser -> click Set default button

Date / Time & Time zone setup

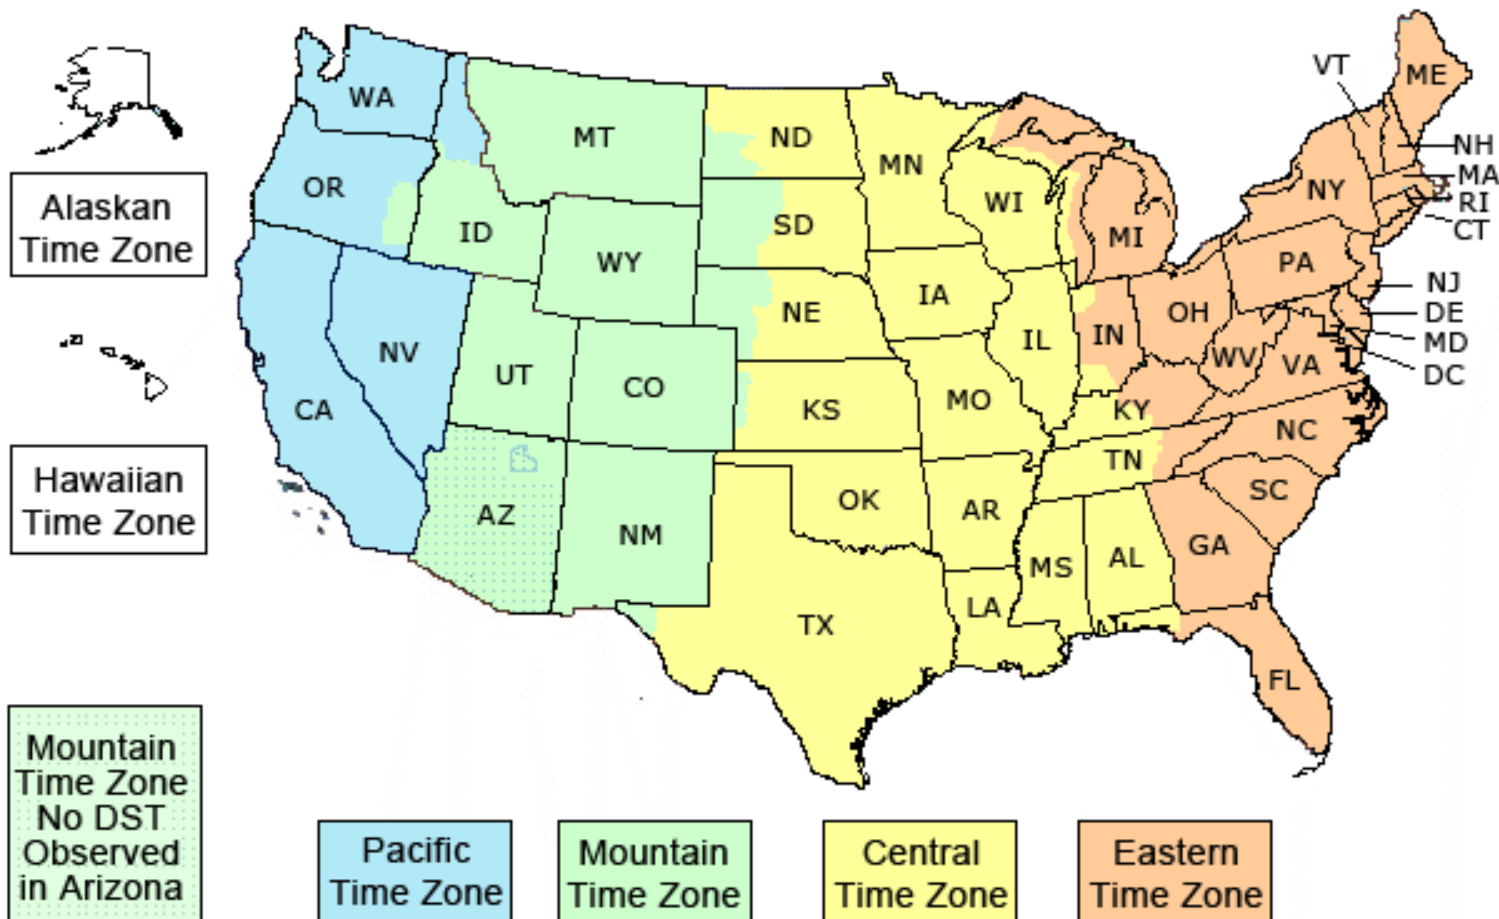

Thursday, August 15, 2024 1:05 PM

Settings -> Time & language -> Date & time

Change time zone to computers local time

	DST	Non-DST
Eastern time	UTC-04:00	UTC-05:00
Central time	UTC-05:00	UTC-06:00
Mountain time	UTC-06:00	UTC-07:00
Pacific time	UTC-07:00	UTC-08:00

If 'Adjust for daylight saving time automatically' is on, just input the Non-DST time.

©www.timetemperature.com

Arizona is in the Mountain Time Zone and does not observe daylight saving time except in the Navajo Indian Nation. To view the current time in Arizona select from the state menu below.

DNS Suffix

Thursday, September 19, 2024 1:53 PM

Start -> Search 'View network connections' and click to open.

Right-click the Ethernet adapter (and Wi-Fi, VPN) -> Properties.

Double click 'Internet Protocol Version 4 (TCP/ IPv4) -> Advanced.

DNS -> fill in DNS Suffix (Domain name, EX, *kikkoman.com* or *jfc.local*)

Ok -> Ok -> Ok

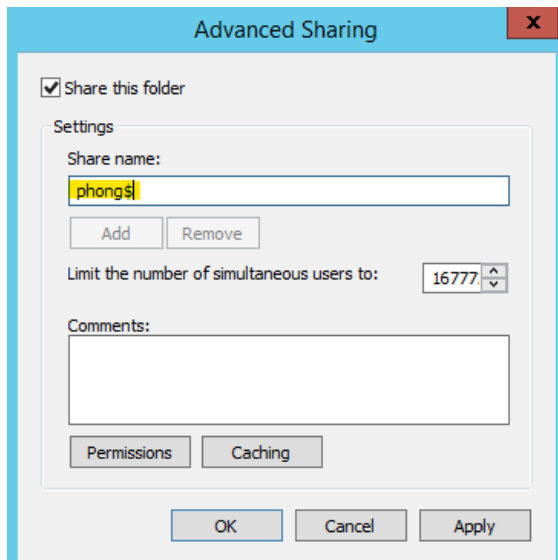

Folder sharing + security

Friday, September 13, 2024 2:32 PM

Folder Sharing:

Log into appropriate BDC -> Windows explorer -> Data (or New Volume, drive D:, etc) -> users -> create user folder

Properties -> Sharing -> Advanced Sharing -> Check 'Share this folder' -> Add '\$' to the end of the share name

twlei -> Check 'Allow' in 'Full Control' row -> apply -> OK -> apply -> OK

Security:

Security -> advanced. Do the following on this page:

- Disable inheritance -> convert
- Change owner to 'Administrators'
- Remove unnecessary principals (including 'Administrators')
 - Leave 'Domain Admins'
- Add the following Principals:
 - Give 'Full Control' permissions:
 - Administrator
 - Admin-bkup
 - Admin-scanner
 - SYSTEM
 - Give 'Modify' permissions:
 - User

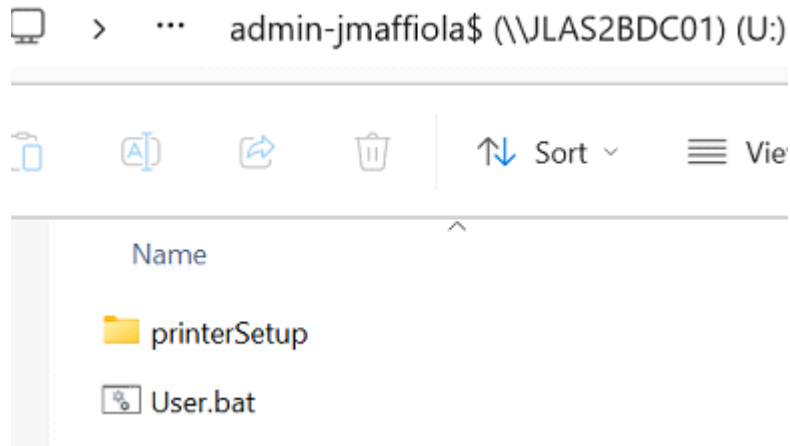

Finally, check replace all child object permission entries

Printer Script

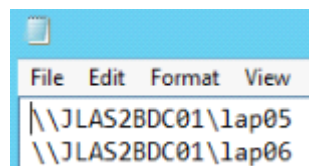

Monday, September 23, 2024 3:17 PM

Go to the users share folder ([\\server\username\\$](#))

Place 'User.bat' and 'printerSetup' folder directly inside the user's share

printerSetup -> printerNames -> Fill in printer names ([\\server\printername](#)). Only one printer per line

In order for this script to work, the User's share must be automatically mapped as a U drive. To check if this will happen, go to [\\server\SYSVOL\<domain>\scripts and open usrlogon.bat](#). Ctrl-F -> search for 'net use u'.

When the user logs in, the script should run. Logs will be left inside the printerSetup folder.

There is a marker file that is generated by the script the first time the printers are added, the script will not try to add any printers if the marker file is present. It is placed in C:\Users\username and is

named printers_added.txt

Copy Temp user to Default

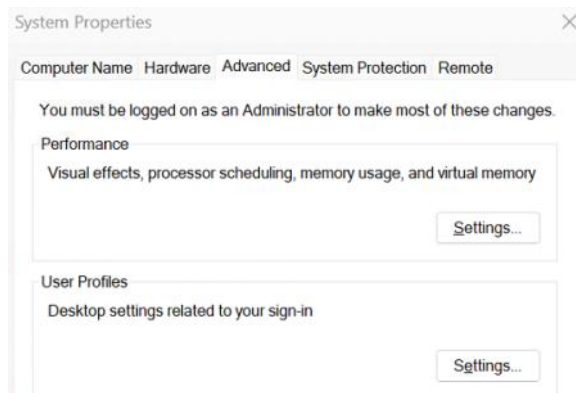

Thursday, August 15, 2024 1:06 PM

DO AFTER POLICIES AND SOFTWARE TA B

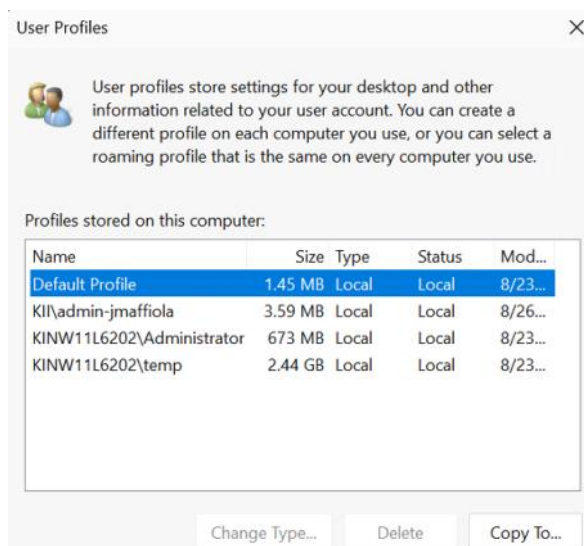

You must log out of the Temp account and log back in to the local Administrator account for these next steps to work.

First, run Windows Enabler as an administrator.

Start -> Search -> Advanced system settings (Or Run -> sysdm.cpl)

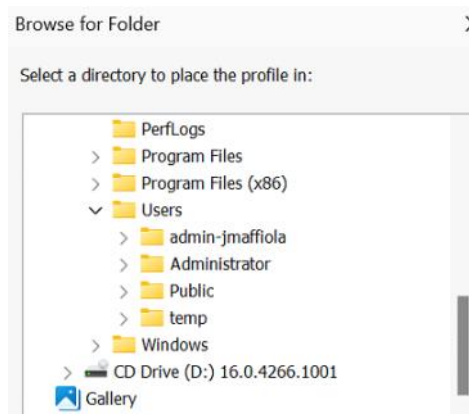

User Profiles

At this point, turn on Windows Enabler. (System tray -> click WinEnabler)

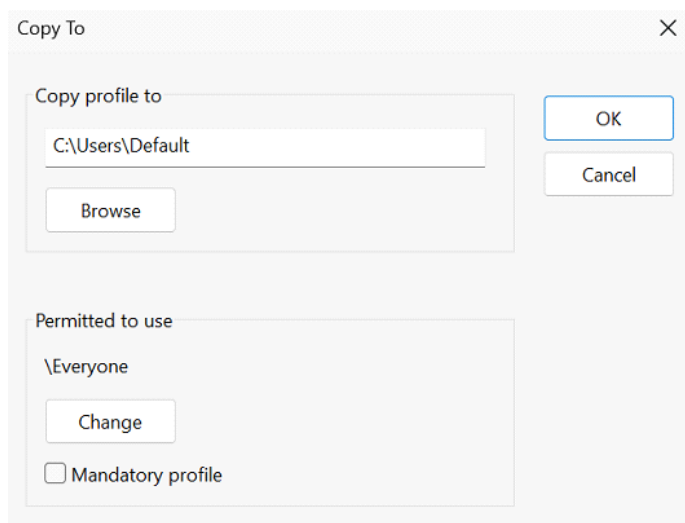

Highlight temp user, click 'Copy To...' -> Browse

If Default user shows up here, select it. If not, find default user in Windows Explorer, then copy the path into the dialog box. The path should be C:\Users\Default

DO NOT FORGET to make sure 'hidden items' are enabled in Windows Explorer.

In the 'Permitted to use' section, click change, and write 'Everyone'.

To finish, click 'OK'. There will be a message telling you that you will be overwriting the default user, go ahead and click yes.

Log in as User & transfer files

Thursday, August 15, 2024 1:11 PM

Transfer Desktop, Documents, Downloads, Pictures, Videos.

To do this, access their old computer via the Computer name in File Explorer. Then append \c\$ to unlock hidden share.

Ex: [\\KMSW11L6146\c\\$](#)

Log into Chrome & GD

Friday, October 31, 2025 9:31 AM

Outlook Setup

Friday, August 16, 2024 1:50 PM

Google Workspace Sync for Microsoft® Outlook®:

First, go to Google Admin -> Users -> Recover information -> change user phone # to yours (for 2FA purposes)

Then, download Google Workspace Sync for Microsoft® Outlook®. To run it, search 'Google Workspace' -> 'Set up a Google Workspace Sync user'. Follow the prompts until Outlook opens and starts syncing.

Set mailbox size limit: taskbar -> ^ -> right click GWS -> Set mailbox size limit

Then, you need to use the Force email formula & email signature files located in <\\\\Kfws9bdc01\\shared\\IT>

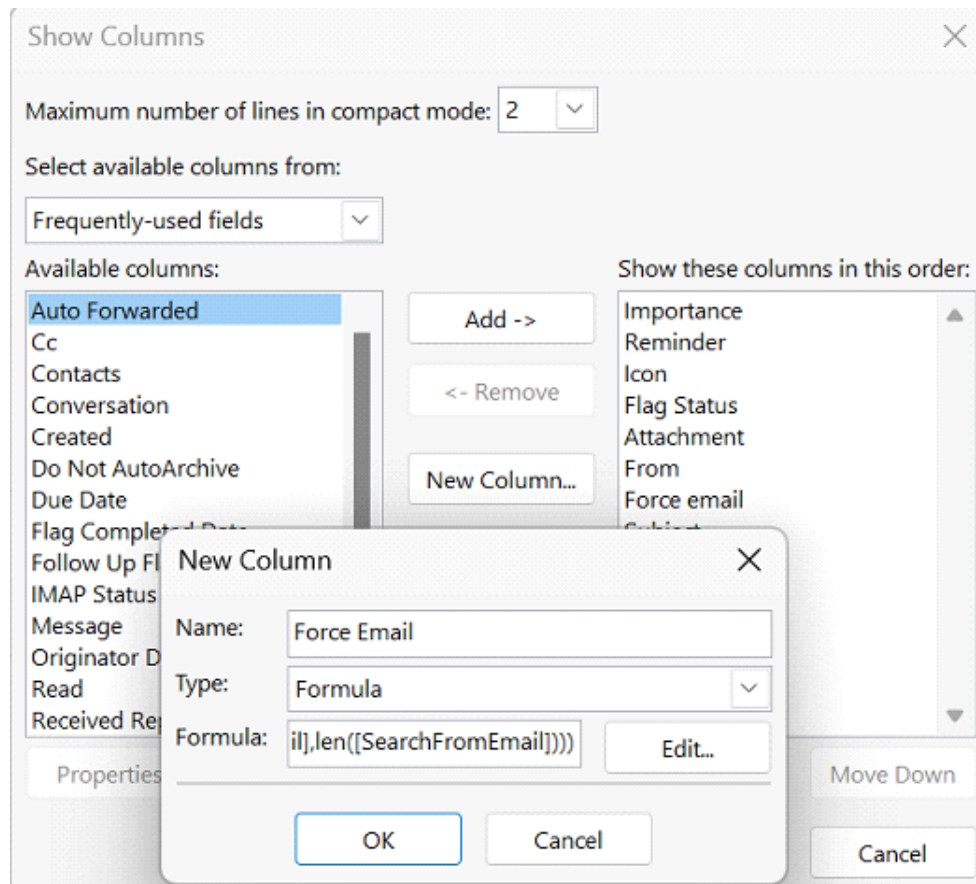

Force Email:

To apply the force email formula, in Outlook, go to View -> ... OR View Settings -> Add Columns.

New Column -> Fill in Name, type, formula

Name	Type	Formula
Force Email	Formula (press F after clicking dropdown)	If(InStr([SearchFromEmail], "@") = 0, "", right([SearchFromEmail],len([SearchFromEmail])))

Afterwards, click on Force Email -> Move Up button, until 'Force Email' is right below 'From'.

Email Signature:

New Email -> Message tab -> Signature -> Signatures -> New

Fill in the signature, then select the name of the signature from the dropdown by 'New messages:'

Signatures and Stationery

E-mail Signature Personal Stationery

Select signature to edit

Mike Anderson

Delete New Save Rename

Choose default signature

E-mail account: Google Workspace

New messages: Mike Anderson

Map network drive

Wednesday, September 11, 2024 9:05 AM

Open windows explorer -> This PC -> ... -> Map network drive

Pick a drive letter (W or U usually) -> Add file server to 'folder' text box

Ex. [\\JHOS2BDC01\Groups](#)

Add printers (if logged into user)

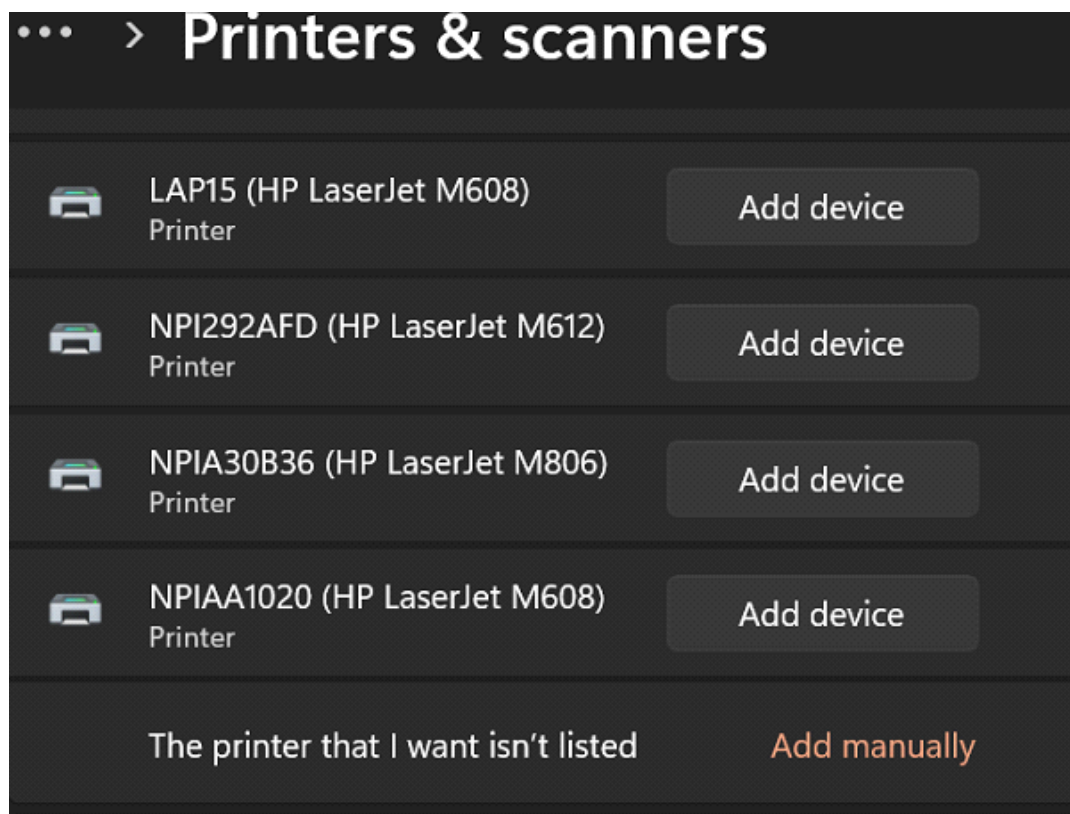

Thursday, August 15, 2024 1:49 PM

[Servers shortcut](#)

Via PowerShell (DO NOT RUN AS ADMINISTRATOR):

```
Add-Printer -ConnectionName "\\server\printer"  
Get-Printer
```

Printers and Scanners -> Add device -> Scroll down to add manually

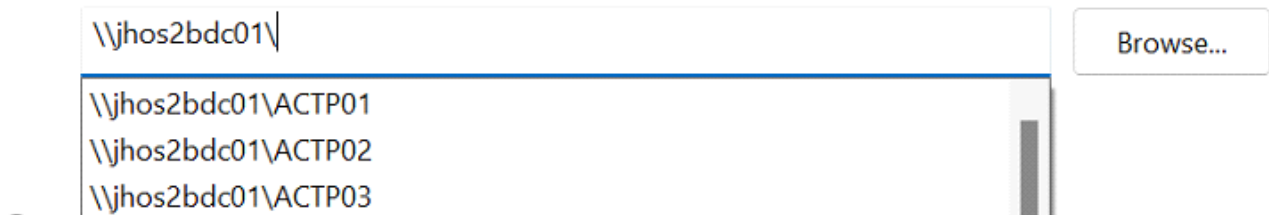

Select a shared printer by name -> Type in file server / BDC

When the \ is appended at the end, a list will drop down showing all possible printer connections for that file server.

Find a printer by other options

- ☐ My printer is a little older. Help me find it.
- ☐ Find a printer in the directory, based on location or feature
- ☒ Select a shared printer by name

A screenshot of a Windows interface for finding a printer. It features a text input field containing the network path '\\jhos2bdc01\'. Below the input field is a dropdown menu showing three options: '\\jhos2bdc01\ACTP01', '\\jhos2bdc01\ACTP02', and '\\jhos2bdc01\ACTP03'. To the right of the input field is a button labeled 'Browse...'.

\\jhos2bdc01\

\\jhos2bdc01\ACTP01

\\jhos2bdc01\ACTP02

\\jhos2bdc01\ACTP03

Browse...

Ask user for printers email template:

I am almost done setting up your new computer! I was wondering, what printers do you use?

To find the names of the printers you use, you can do the following:

Click Start (windows logo) -> Search for 'Printers and Scanners' and open the program.

Here, you can see which printers you use. There will be a few default ones, for example, the following are all default printers:

- Fax
- Microsoft Print to PDF
- Microsoft XPS Document Writer
- OneNote (Desktop)

Please tell me about any other printers that show up on that list.

Thank you,

Misc

[Server account stuff](#)

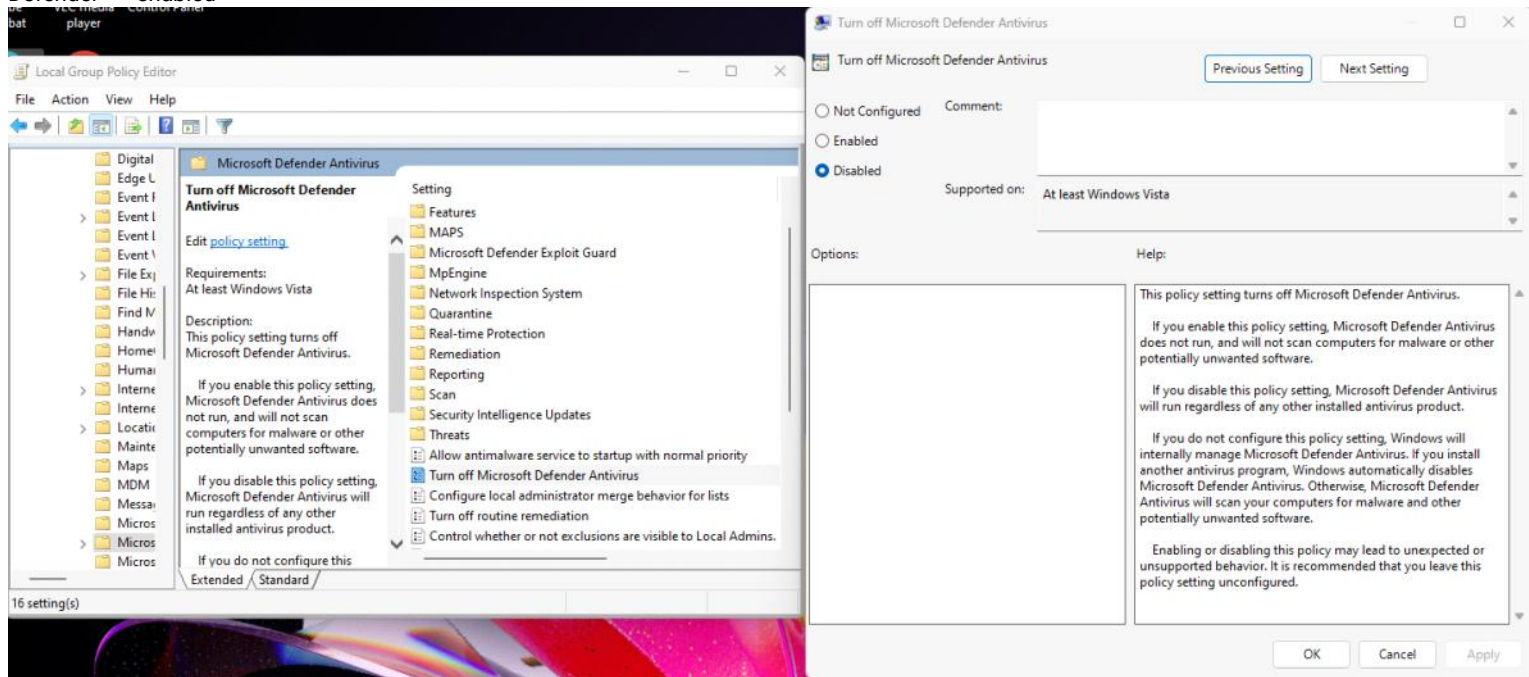

Disable Cortana, Defender, Onedrive

Thursday, August 15, 2024 1:04 PM

gpedit.msc > computer configuration > administrative template > Windows Components > Search > "Allow Cortana" -> disabled

gpedit.msc > computer configuration > administrative template > Windows Components > Microsoft Defender Antivirus -> "Turn off Windows Defender" -> enabled

gpedit.msc > computer configuration > administrative template > Windows Components > OneDrive > Prevent the usage of OneDrive for file storage > enabled

Jose Vazquez's first Laptop

Thursday, August 22, 2024 2:03 PM

Old Computer # KMS21VXCW3WIN11.kii.local

New Computer # KINW11L6202

IP Address: 10.100.6.19

Yoko Conzelman

Tuesday, August 27, 2024 11:20 AM

JFCW11D5101 for yconzelman (Yoko Conzelman) (current IP: 10.0.6.127)

Domain password: Yamadarin1211!

Email password: YCmer@jfc!

UPS

Wednesday, August 28, 2024 9:05 AM

UPS Support ticket: CS18483658

UPS Account # 588104

UPS PC: Username: ups Password: Kikkoman2024!

Physical Setup:

Between Dock 29 - 30 LTL / UPS desk

Ports 12 & 14 don't provide internet

Switch IP: 10.210.2.17

14 has up and down arrow activity

IP: 192.168.213.220

Mask: 255.255.255.0

Gateway: 192.168.213.1

DNS: 10.210.3.5, 10.210.3.10

PC is set up in the warehouse.

Has three outstanding issues:

~~First the Ethernet ports on the wall do not seem to provide internet. I talked to Gabe, he said that we will look into it after his~~

~~meetings.~~ Issue fixed

Secondly, UPS worldship still needs to be tested. Waiting for a call from Jeff when they get their next package that they will ship via UPS.

Finally, Jeff asked me if I can install a kiosk mode, where users can only access the shipping application. Currently researching.

Tomomi Mime

Monday, September 9, 2024 1:54 PM

Current: JFCW11L6001 Office 365/OneDrive/Adobe Reader

New PC: KMS3PCXFW3WIN11

IP: 10.0.6.103

even though their current laptop names start with JFC, they are actually JLA users.

Mr. Mime transferred from JHO and it appears that the computer name was not changed back then. He still accesses both JHO and JLA shared folders, so this would be a good chance set it up as a JLA laptop, but could you map an extra drive to JHOS2BDC01\Groups? His docking station was acting up as well, so he already has a new docking station.

Printers: LAP06 as default and LAP02

Joey Maffiola <jmaffiola@kmsnet.com>

2 New Laptops

2 messages

Thomas Mano <tmano@kmsnet.com>
To: Joey Maffiola <jmaffiola@kmsnet.com>
Cc: Hide Sakamoto <hide@kmsnet.com>

Mon, Sep 9, 2024 at 1:03 PM

Joey,

Good morning!

I have 2 new laptops ready for setup. These 2 new users are on the JLA priority list as their current laptops have battery issues. I already modified Power Options so that they won't go to Sleep.

The new laptops are (they are the same models with same spec):
KMS3PCXFW3WIN11
KMSHKCXFW3WIN11

Users:

Tomomi Mime Current: JFCW11L6001 Office 365/OneDrive/Adobe Reader
Patty Hong Current: JFCW10L6016 Office 2016 Pro/Acrobat Pro

Some notes about these users - even though their current laptop names start with JFC, they are actually JLA users.

Mr. Mime transferred from JHO and it appears that the computer name was not changed back then. He still accesses both JHO and JLA shared folders, so this would be a good chance set it up as a JLA laptop, but could you map an extra drive to JHOS2BDC01\Groups? His docking station was acting up as well, so he already has a new docking station.

Patty is part of JLA Export Department. Export department used to be part of JHO, and they share the same files on the JHO File Server with IDC and JHO Foreign Sales, therefore, their PC account remained as JHO so that W: points to JHO File Server.

Let me know if you have any questions!

Thank you,
Thomas Mano
